After the site location decision has been made, the next focus in production planning is the facility's layout. The goal is to determine the most efficient and effective design for the particular production process.Facility Layout and Location | Introduction to BusinessFor an organization to have an effective and efficient manufacturing unit, it is important that special attention is given to layout and planning. Facility layout is an arrangement of different aspects of manufacturing in an appropriate manner as to achieve desired production results. Facility layout considers available space, final product, safety of users and facility and convenience of operations.Facility Layout - Objectives, Design and Factors Affecting... 7.2: Facility Location and Layout: ...This technique is used in determining the location of a facility which will either reduce travel time or lower shipping costs. Distribution cost is seen as a linear function of the distance and quantity shipped. The Center of Gravity Method involves the use of a visual map and a coordinate system; the ... 7.2: Facility Location and Layout | Saylor BUS306...

...Facility Layout and Location: Chapter 6 SUMMARY: Location decisions are the strategic decisions that require large financial investments and are irreversible in nature. A number of factors like market related factors, tangible or cost factors and intangible or qualitative factors, affect and are affected by the location choice.Facility Location and Layout | Operations Management ...A comprehensive introduction to quantitative methods for facility layout and location. (source: Nielsen Book Data)Subjects: Subject Plant layout, Factories > Location, Operations research. Bibliographic information. Publication date 1992 ISBN 0132992310 9780132992312.
